Abstract not available for CN1330547

Abstract of corresponding document: WO0035460

The invention provides compositions comprising the nucleotide analog 9-[2-[[bis[(pivaloyloxy)methyl]phosphono]methoxy]ethyl]adenine and an alkaline excipient with or without L-carnitine-L-tartrate. The compositions are more stable than those previously described. The invention also provides methods to make the compositions and their intermediates.
